

## NHS Bury award SharePoint 2010 project to Cloud2

NHS Bury, a PCT in Greater Manchester, serving a population of around 180,000, commences a strategic Intranet and Document Management solution using the NHS Solution Accelerator from Cloud2, the leading provider of SharePoint solutions into the NHS and healthcare sector, and Microsoft SharePoint Server 2010.

NHS Bury and Community Services Bury needed a strategic internal communication, collaboration and enterprise document management platform that would provide staff with the tools needed to enable them to work more effectively. The solution they specified needed to support a logical separation of content for the two aspects of the organisation, NHS Bury (the commissioning arm of the organisation) and Community Services Bury (the provider arm of the organisation), whilst providing a secure mechanism for content to be shared where appropriate.

Following a thorough tender process, Cloud2 have been selected as the preferred provider to implement their NHS Solution Accelerator with SharePoint 2010 to deliver the project requirements.

Ann Halpin, Associate Director of IM&T, for NHS Bury said;

“Microsoft Sharepoint 2010 offered us the ideal platform to meet our needs. The benefits of implementing Sharepoint for NHS Bury include the provision of a comprehensive content management system and facilitating information sharing through a secured environment. We are delighted to work with Cloud2 as our preferred provider following a tender process, and are looking forward to working closely with them in the provision of this solution.”

“Our NHS Solution Accelerator is a unique, pre-configured Intranet and Document Management solution providing a rapid and agile approach to delivering SharePoint in the NHS. The Solution Accelerator is the base foundation that we leverage to support and accelerate the Trust’s decision making for the final solution configuration“

Taran Sohal, Director, Cloud2
